

Under **No.** Influence

Brand Book — the single reference for how UNI looks and sounds. Every value is pulled straight from the live application design tokens.

VERSION 1.0 · 2026-06-01

1 · Brand at a glance

Under No Influence helps people discover bars, restaurants and cafés with a genuine alcohol-free offer. The brand is confident, modern and a little defiant — the name itself is the statement. Visually: clean high-contrast surfaces, one decisive violet, and a single signature gesture, the emphasised **NO.**

NAME	Under No Influence · short form UNI
SIGNATURE MARK	NO. — the highlighted fragment of the wordmark
PRIMARY COLOUR	 Violet <code>#7c3aed</code>
CORE TYPEFACE	Inter
MODES	Light & dark are equal, first-class citizens

2 · Logo

The primary logo is a two-line wordmark in custom letterforms, delivered as inline SVG (not a font). The fragment **NO.** is set in accent violet; the rest uses `currentColor`, so the mark inherits the surrounding text colour and works in both modes from a single asset.

ON LIGHT

UNDER NO.
INFLUENCE

ON DARK

UNDER NO.
INFLUENCE

APP MARK / FAVICON

In small square contexts the full wordmark sits on a rounded dark tile (`#141720`): white letters with **NO.** in violet.

`favicon.svg` · `favicon.ico` · `apple-touch-icon.png` · `icon-192/512.png`

DON'T

- ✗ Recolour **NO.** to anything but the accent token
- ✗ Stretch, rotate, or add shadows
- ✗ Rebuild the wordmark in a system font
- ✗ Place on a busy photo without a solid backing

Clear space around the wordmark equals the height of the **N**. Source of truth: inline SVG in `resources/views/partials/nav.blade.php`.

3 · Colour

All colours are CSS custom properties. Brand colours (`primary` , `accent`) do not flip between modes; neutrals do.

BRAND

primary

accent
`#825fff`
The **NO.** mark, CTAs

primary-muted #a78bfa Secondary emphasis	primary-light #c4b5fd Tints, subtle bg	ok #00b5ff Positive / info signal	fg light / dark #0D0F14 · #e8e4df Primary text both modes
---	---	--	--

DRINK CATEGORIES — FIXED SEMANTIC PALETTE

 Piwo #B87A5E	 Wino #9b6b9b	 Spirits #7c9b5e	 Drinks #5e8db8
 Cydr #b8a25e	 Musujace #5eb8a2		

NEUTRALS — LIGHT

 base	#f7f8fb
 surface	#ffffff
 surface-hover	#eef2f7
 fg	#0D0F14
 ui-border	rgba(13,15,20,.10)

NEUTRALS — DARK

 base	#0D0F14
 surface	#141720
 surface-hover	#1e2230
 fg	#e8e4df
ui-border	rgba(255,255,255,.08)

Foreground tokens are tuned to meet **WCAG AA** on both `base` and `surface`. Re-check AA for any new text/background pair.

4 · Typography

Inter — the interface workhorse

All UI & body text · `--font-sans: 'Inter'`

Regular 400

Medium 500

Semibold 600

Bold 700

ROLE	TYPEFACE	WEIGHTS	NOTES
UI & body	Inter	400 / 500 / 600 / 700	Workhorse for all interface text
Display	Brawler	400 / 700	Loaded via Bunny Fonts for editorial moments
Mono	system mono	400	Code, slugs, technical strings

Hierarchy principle: establish hierarchy with weight and size, not colour. Reserve the violet for things that are actually interactive.

5 · Dark mode

6 · Voice & tone

Tokens flip on `.dark` applied to `<html>` before first paint — no flash.

- Brand violet & drink palette stay identical in both modes
- Never hard-code `#fff` / `#000` — use tokens
- Test every new component in both modes
- **Confident, not preachy** — we help people choose, we don't lecture
- **Plain & specific** — concrete counts beat vague marketing
- **Polish-first** — UI in Polish, Polish category names
- The name does the attitude — let **NO.** carry the edge

7 · Asset inventory

ASSET	PATH
Wordmark (inline SVG)	<code>resources/views/partials/nav.blade.php</code>
Favicon (SVG / ICO)	<code>public/favicon.svg</code> · <code>public/favicon.ico</code>
Apple touch icon	<code>public/apple-touch-icon.png</code>
PWA icons	<code>public/icon-192.png</code> · <code>public/icon-512.png</code>
Design tokens (source of truth)	<code>resources/css/app.css</code>

Colours and type live in `resources/css/app.css` . If a value here disagrees with that file, **the file wins** — update this book to match.
